

What do you see?

An absolutely beautiful baby who also happens to have **Torticollis**, tight neck muscles, and **Plagiocephaly**, flattened or misshapen head.

- Does your baby have supervised tummy time while awake at least 10 times per day?
- Can your baby turn his/her head to the left and right sides easily?
- Have you noticed a flat spot on the back of your baby's head?

If you have a concern about a baby, contact ***tiny-k Early Intervention*** today!
